SUGAN RAJ H

AI ENGINEER | FULL-STACK DEVELOPER

India | +91 9360758202 | suganraj.tech@gmail.com | linkedin.com/in/sugan-raj-61896b36a | github.com/sugan404

PROFESSIONAL SUMMARY

AI Engineer and Full-Stack Developer focused on LLM-powered applications, SaaS product development, and backend engineering. Founder of Citelora, an AI search visibility SaaS designed to help businesses analyze and improve their visibility in AI-generated answers. Experienced in building AI-powered workflows, REST APIs, authentication systems, database integrations, simulation systems, and web applications using Python, FastAPI, React, TypeScript, PostgreSQL, and Redis. Interested in developing reliable, practical software solutions that address real-world problems.

TECHNICAL SKILLS

Programming Languages: Python

AI Engineering: LLM API Integration, Prompt Engineering, RAG Fundamentals, AI Tool Calling, Structured AI Outputs

Backend Development: FastAPI, REST APIs, Authentication, JWT, Background Processing

Frontend Development: React, Tailwind CSS, Vite

Simulation & Modeling: Agent-Based Modeling, Route Planning, Simulation Metrics

Databases & Caching: PostgreSQL, Supabase, Redis

Tools & Deployment: Git, GitHub, Vercel, Netlify, Render

Software Engineering: API Integration, Debugging, Database Design, Automated Testing

WORK EXPERIENCE

Citelora — AI Search Visibility SaaS

October 2026 – Present

Founder & Software Engineer

- Founded and developed Citelora, an AI search visibility platform helping businesses analyze
- their representation in AI-generated answers.
- Built workflows for prompt analysis, response evaluation, and citation tracking.
- Implemented REST APIs, authentication, database models, and automated tests for core services.
- Designed a workflow to turn visibility findings into prioritized optimization recommendations.
- Validated service-level behavior with automated tests; database-backed end-to-end workflows
- remain under verification.

Technologies: Python, FastAPI, React, TypeScript, PostgreSQL, Supabase, Redis, Git

PROJECTS

Predictive AI Evacuation System

October 2026

AI Simulation & Research Project

- Built an agent-based fire-evacuation simulation for a two-storey residential building, modeling occupants, routes, fire, and smoke.
- Compared static, reactive, and predictive routing using evacuation success, time, route changes, and exposure metrics; added automated tests for simulation behavior.

Technologies: Python, Agent-Based Modeling, Pytest, Simulation and Route Planning

ShopAssist AI — E-commerce Customer Support Agent

August 2026

Full-Stack AI Developer | Hackathon Project

- Built an AI support-agent prototype for product search, order-status queries, return eligibility, and recommendations using sample data.
- Implemented conversational context and FastAPI endpoints; deployed the frontend on Vercel and backend on Render.

Technologies: React, TypeScript, Python, FastAPI, Tailwind CSS, LangChain

Payout Harmony — Shopify Payout Reconciliation SaaS

August 2025 – October 2025

- Developed a prototype concept for Shopify payout reconciliation and accounting workflows.
- Explored payout-data consistency and e-commerce reconciliation requirements; published
- the frontend using Netlify.

Technologies: TypeScript, Netlify

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence and Data Science Currently pursuing

Jayaraj Annapackiam CSI College of Engineering, Nazareth, Tamil Nadu

Anna University affiliated

Higher Secondary Certificate (HSC)

Margoschis Higher Secondary School, Nazareth, Tamil Nadu

INTERNSHIPS & TECHNICAL TRAINING

NoviTech R&D Private Limited April 2025 – August 2025

Technical Training

- Artificial Intelligence and Machine Learning | April 14 – May 14, 2025
- Full-Stack Development | May 15 – June 15, 2025
- Deep Learning | July 17 – August 17, 2025

CERTIFICATIONS & RECOGNITION

- **Ignite Bootcamp** — Venture Idea Development, Wadhwani Foundation | March 2026
- **IBM Naan Mudhalvan Hackathon** — Frontend Technologies Participation Certificate
- **Continuous Integration and Delivery (DevOps)** — Infosys Springboard | September 2025

LANGUAGES

- **Tamil** — Native
- **English** — Intermediate (B1)
